Scope of Work (SOW) – UTP Cable Laying and Associated Activities

1. Project Description

The project involves carrying out network maintenance and provisioning of new network connections to support the institute's operational and departmental requirements.

2. Scope of Work – Tasks and Activities

- **Cable Installation:**
Laying, pulling, and routing of UTP cables through designated pathways such as conduits, trays, false ceilings, and walls. Work will adhere to best practices for maintaining proper bending radius and pulling tension limits. Required support infrastructure (trays, conduits, J-hooks) will be installed as needed.
 - **Termination:**
All cables will be terminated at patch panels and user-end Information Outlets (IOs) using LAN structured cabling standards.
 - **Grounding and Bonding:**
All metallic elements of the cabling system (racks, trays, armoured cables, etc.) will be properly grounded in compliance with LAN structured cabling standards.
 - **Labelling:**
All outlets, patch panels, and cables will be clearly and consistently labelled at both ends for easy identification and future maintenance.
 - **Testing and Certification:**
Each installed cable drop will be tested and certified for continuity, length, and performance to ensure compliance with industry standards.
 - **Removal of Old Cables:**
Removal and proper disposal of old or damaged UTP cables, conduits, and casing materials.
 - **Excavation Work (if required):**
Digging and refilling work will be carried out for underground cabling, following safety and site restoration guidelines.
-

3. Supply and Installation

- **Material:**
All materials will be delivered to the site in their original packaging.
- **Pathway Installation:**
Installation of physical pathways (PVC conduits, casing/capping, or cable trays) to ensure organized and protected routing of cables.
- **Cable Pulling and Laying:**
UTP cables will be laid through designated pathways using proper techniques to prevent kinks, sharp bends, or excess tension.

- **Termination Work:**
Termination will be performed at both ends — patch panels in racks and information outlets in work areas — adhering strictly to specified wiring standards and ensuring pair integrity.
 - **System Integration:**
Integration with existing network infrastructure will be validated to confirm full operational readiness.
 - **Site Clean-Up:**
The worksite will be cleaned, and all debris and leftover materials will be removed or handed over as directed.
-

Estimated Quantities

Sr. No.	Nature of Work	Approx. Quantity
1	Cable laying with casing capping/pipe, using UTP CAT-6 cable with IO and faceplate	4,900 meters
2	Removal of old/damaged network cables	2,000 meters
3	Electrical cable laying – 3-core, 2.5 sq. mm (including digging and refilling)	200 meters
